RESTORING BEAUTY AND RADIANCE

Dr Nettle's work began many years ago with reconstructing congenitally deformed faces, or faces injured in trauma. Over time, he was increasingly drawn to facial aesthetic surgery, which is his passion and his focus at Silkwood Medical Clinic.

Dr Nettle continues his research and has published many articles in the areas of eliminating the "face-lifted" look, using dermal stimulants as an adjunct to facial rejuvenation surgery, and refining techniques in eyelid surgery.

Today, our clients have available a very wide range of treatments from the team at Silkwood Medical. Having more choices improves the satisfaction for clients and ensures you receive the best treatment for the optimal result.

*Offer available until June 1st, 09

IS SIZE THE ISSUE?

Our own plastic surgeon Dr Benjamin Norris has an opinion. It's about shape and body harmony.

Too large or too small. Breasts which sag with age or post breast feeding. The aim is a well proportioned and harmonious result.

"I see many women looking for breast enhancement, and almost all want natural-looking results, and that is perfectly achievable. One no longer needs to have an overly-obvious outcome. It's about the shape and proportion of the breast – never the size."

Beast enhancement is now an extremely popular procedure which can satisfy a host of concerns and still look natural. It's not about the size, it's about shape – and it's Dr Norris' years of training and experience in this area that makes the difference here.

RECENT CHANGES?

Especially in times of economic uncertainty, potential clients choose 'tried and tested' solutions to their aesthetic challenges. This is true of no treatment more than breast augmentation. Because the results are predictable, immediate, and because no ongoing maintenance is required, clients choose this procedure.

For more information see our specialist breast surgery resource: www.breastsurgery.net.au

NEW TREATMENT FOR HANDS – with BONUS IPL

Your hands are never out of view – reduce the tell-tale signs of ageing with this new injectable treatment [M+] hyaluronic + glycerol. The unique formula is like a glass of water for the skin.

Book a course of 3 treatments and receive 3 IPL for hands at no extra cost - for optimum results!

Perfect for décolletage as well!

Offer available until June 1st, 2009

LIGHT BASED SKIN REJUVENATION

Now that the summer sun [and the sun-tan] is a memory, many of us will begin our 'light-based' treatments to restore and enhance our appearance.

FOR SKIN REJUVENATION

Non-invasive skin rejuvenation using broad-spectrum light is an extremely popular cosmetic procedure. Not just for face - reduce the tell-tale signs of ageing on hands and décolletage too!

This treatment is recommended to treat:

- Pigmentation
- Fine veins and vessels
- File lines and wrinkles
- diffused redness
- skin laxity
- coarse skin texture

What to expect:

4-5 treatments to achieve the optimal outcome. Every three weeks. **No preparation, rapid results + no downtime**

FOR PERMANENT HAIR REDUCTION

This is an extremely popular light-based treatment which is favoured for men and women.

This treatment is recommended to treat:

Excess or unwanted hair on

- face
- neck
- back
- shoulders
- bikini
- legs
- arms
- underarms

What to expect:

6-8 treatments on dark hair / fair skin
Blonde, red, grey and very fine hair will require more treatments.
No preparation, rapid results + no downtime
