Glowing skin for Mardi Gras

ADVERTORIAL

The Mardi Gras season kicked off last Sunday at Fair Day but there's still time to give your skin that extra lift before the parade and its official after-party at Fox Studios.

Silkwood Medical are not only the leaders in facial cosmetic surgery but also in non-surgical procedures. The clinic performs a variety of treatments that result in younger and more luminous-looking skin.

Popular treatments for men include dermabrasion, microdermabrasion, chemical peels, skintight, ProFractional peel and laser skin resurfacing.

"If you want to freshen up your skin and make it more radiant and polished we have Medi Facial, using enzymes, acids and vitamin A. We can minimise your downtime with maximum result, for example with flakiness, but a couple of days later your skin is just glowing. Everything we use is natural with high strength antioxidants," said paramedical aesthetician Maureen Cole.

"We then have Microlaser peel for when your skin is thick and needs to be refined very quickly. There's a slight sunburn effect for a few days but then your skin just is radiant with even texture and tone — perfect quick fix for a pre-Mardi Gras.

"Then we have the ProFractional Peel

and there are about four or five days of downtime and your skin comes alive and can actually stop the clock. Three treatments are brilliant for acne scarring, thickening the skin and fine lines and wrinkles, creating new growth and stimulates collagen at a fast rate."

Each staff member has been hand-picked and prides themselves on making sure every client leaves looking younger, fresher and feeling good about themselves.

If you're in a hurry this Mardi Gras and want an even quicker fix with no limited downtime the answer is Botox. Look de-stressed and relaxed this party — you can even get it done before the Mardi Gras party and enjoy the effects long after the party.

"Botox is the greatest thing God ever created," Cole said.

"Injectables are the way to go and the easiest quick fix around. If gravity is dragging you down, we can plump you up in minutes. "They can smooth you down, make you look several years younger. Botox and fillers can help slow down the ageing process because you're not using those muscles."

Make it your Mardi Gras resolution to get your skin in shape and look that little bit younger and fresher for those all-important nights of partying.

Get your skin ready for the party season
