MEDISPA

ENHANCING YOUR NATURAL BEAUTY

Welcome to Silkwood Medical located in the heart of Bondi Junction, the hub for aesthetic procedures. At our elegant Medispa clinic, we not only offer safe and non-invasive cosmetic procedures, but also cutting-edge medical grade treatments that actually work.

Silkwood Medical are world renowned leaders in Aesthetic Plastic Surgery. Our highly skilled team of experts in their field will always provide you with the best quality and care. We believe in enhancing your natural beauty so that you can look and feel your best. If you want to look as good on the outside as you feel on the inside, we can tailor a treatment plan to suit your needs, time and budget.

A thorough consultation is performed prior to treatment to discuss your particular concerns using the latest technology including VECTRA 3D imaging. This helps you to visualise the different layers of your skin so we can determine suitable treatments for you. Nothing is more important to us than our patients' happiness and satisfaction.

We are looking forward to welcoming you at Silkwood Medispa.

Dr Warwick Nettle
Practice Director

SILKWOOD MEDISPA INSTANT PICK ME UPS

Microdermabrasion 30mins **\$150**

Microdermabrasion is designed to refresh the appearance of the skin using an exfoliating action. Microdermabrasion helps to polish the skin, all while promoting new skin renewal. This treatment will help to improve fine lines and wrinkles, and it is most effective in improving skin texture, uneven skin tones, acne marks and scarring.

Epiblade 45mins **\$150**

Using a specialised implement with great precision, the outer layer of lifeless skin cells is exfoliated while also removing the vellus facial hair of women. A manual exfoliation performed by a qualified aesthetician, it is a deeper exfoliation than microdermabrasion and has the secondary action of hair removal. With this treatment, the skin's surface will look smoother, polished, and renewed.

Blueberry Smoothie Peel 30mins **\$150**

This refreshing, antioxidant peel combines a gentle acid with active blueberry extracts and enzymes to lightly exfoliate the skin without visible irritation. Suitable for all skin types, this superficial peel smoothes away surface impurities and invigorates the skin for a clear, youthful glow.

Vit A Peel 45mins **\$220**

A vitamin A peel uses medical strength retinoic acid to activate cell turnover. Vitamin A peels are used for treatment of aging concerns, skin rejuvenation and pigmentation to exfoliate thickened, sun damaged cells, giving the skin a healthy glow, reducing pore size and leaving the skin softer and smoother. This peel will also have a positive effect on settling acne breakouts. Skin must be prepped first, and peeling may occur after.

Optional Adds on treatments with our Medifacials

Microdermabrasion **\$50**

Blueberry Smoothie Peel **\$100**

Hyaluronic Mask **\$50**

Massage **\$50**

Dermastamp with Hyaluronic Mask

90mins

\$500.00

The Dermastamp uses very fine needles to promote skin stimulation and skin rejuvenation. This is unlike any heat based technology as there is no skin burning and skin coagulation. The side effects are dramatically reduced and the risk, almost zero.

Dermastamp uses vertical penetration to create infusion channels into the skin to instantly create hydration with hyaluronic acid and infuse skin stimulating ingredients. You will notice a fresher skin within 6 weeks. However your skin will continue to improve over 6-12 months.

Great for:

- tissue regeneration
- fine lines and wrinkles
- stretch marks
- acne scarring
- surgical scarring
- skin rejuvenation

BBL 'Forever Young'

from 30mins

from \$450

BBL technology is based on the same principle as IPL and laser, but instead emits a Broadband light to reach several layers of the skin at once. During the intense pulse light treatment, electric energies break up the pigment and/or blood in the tissues. Collagen production is stimulated, restoring your skin to a more youthful appearance. A visual improvement of uneven skintone, pigment and redness will be attain, with little downtime.

Our Forever Young treatment can be performed on the neck, chest, hands and arms.

BBL is a great for:

- skin rejuvenation
- sun damage
- agein
- brown spots
- red blotchiness from skin texture
- uneven or rough spider vessels or rosacea
- fine lines and wrinkles
- acne
- acne scarring has also been shown to improve over a treatment series

Ultherapy

from 45 mins

from \$900

Ultherapy uses safe, time-tested ultrasound energy to lift and tighten the skin naturally-without surgery or downtime. Ultherapy is a great alternative for patients who are not ready for surgery, or for patients looking to extend the effects of cosmetic surgery.

Ultherapy deposits focused ultrasound energy deep beneath the skin at the optimal temperature for collagen regeneration. The treatment jumpstarts a natural process, known as neocollagenesis, to produce fresh, new collagen.

Ultherapy targets skin laxity in the neck, jawline and lower face. It gradually lifts skin on the eyebrows, and smooths lines and wrinkles on décolletage.

NanoLaserPeel

30mins

from \$500

The NanoLaserPeel is a alternative treatment to microdermabrasion and chemical peels. It uses laser to lightly remove the top layer of the skin to promote the skins own renewal process. NanoLaserPeel is a perfect introduction to laser treatments to help smooth and brighten the skin.

Estimated downtime 2-3 days.

Great to improve:

- Skin texture
- Soften skin
- Skin condition
- Age Spots

MicroLaserPeel

from 75mins

from \$1200

The MicroLaserPeel removes a thin layer of damaged skin to improve texture and provide a more youthful appearance. It provides superior results because it can be administered with great precision of depth. Removing the top layer eliminates some of the damaged cells that can give skin a tired, aged look. As the skin heals, fresh cells grow and resurface the treated area.

Estimated downtime 5-10 days.

Improvement can be seen in the following concerns:

- Fine lines
- Pigmentation
- Uneven skintone
- Scars

ProFractional Laser

from 75mins

from \$1200

ProFractional laser achieves excellent resurfacing results with minimal downtime. The Erbium YAG ProFractional laser ablates narrow-diameter channels into the skin, covering a fraction of the total treatment area.

This action initiates the body's wound healing response, while leaving the surrounding tissue intact for rapid healing. The benefits of ProFractional include increased patient comfort, shorter healing times, and tunable results that can range from subtle to dramatic. ProFractional can be used on all skin types, both on face and body.

Estimated downtime 5-10 days.

Great to improve:

- Skin tone and texture
- Acne scars
- Pigmentation problems
- Fine to moderate lines

MicroLaserPeel + ProFractional

from 90mins

from \$1600

MicroLaserPeel is a distinct treatment that ablates the damaged outermost layer of skin to reveal smoother, healthier, younger-looking skin underneath with more uniform skin tone and texture. This combined treatment involves MicroLaser Peel for full field treatment to remove superficial irregularities and ProFractional to stimulate collagen remodeling through deep fractional ablation.

Estimated downtime 7-10 days.

Great for improving the appearance of common skin conditions such as:

- Wrinkles and fine lines
- Acne scars
- Keratoses
- Pigmentary conditions

CoolSculpting

1hr/treatment area

from \$990

CoolSculpting is a non-invasive, non-surgical procedure that uses controlled cooling to safely target and eliminate diet and exercise-resistant fat.

CoolSculpting technology safely delivers precisely controlled cooling to gently and effectively target the fat cells underneath the skin. The treated fat cells are crystallised (frozen), and then are naturally eliminated by your body over time leaving a more sculpted you.

Great for pinchable pockets of fat in the following areas:

- Abdomen
- Flanks
- Inner and outer thighs
- Arms
- Male Chest

MONALISA TOUCH

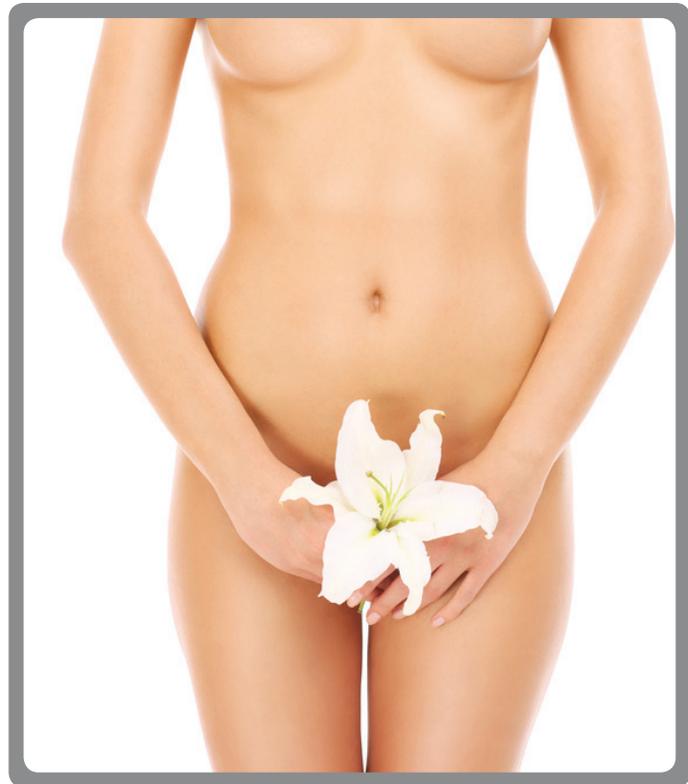

MonaLisa Touch is an innovative laser procedure for vaginal rejuvenation. This treatment improves the state of the mucosa that lines the vaginal walls through mini-invasive laser-assisted procedures. MonaLisa Touch is not an aesthetic treatment, as the term "rejuvenation" may suggest, because the beneficial effects of the treatment "rejuvenates" the vaginal tissue, restoring the functionality lost over time.

MonaLisa Touch is one of the most advanced vaginal photorejuvenation techniques and relieves the most troublesome symptoms associated with vaginal atrophy: poor vaginal lubrication, vulvar itching, dryness, heaviness, and even pain during intercourse can become a memory of the past. The laser's effect on vaginal mucosa tissue stimulates the production of collagen, improves functionality of the treated area, and restores proper blood flow.

MonaLisa Touch is natural, safe and mini-invasive, it restores tone to tissues and increases blood flow and lubrication. In one word, it naturally normalises the physiology of the vaginal walls.

Helps to improve:

- Tightening of the vaginal structure
- Soreness or pain with sexual activity
- Discomfort from scarring
- More contoured and refined vagina

Anti Wrinkle Injections from 30 mins

Anti-wrinkle injections can rejuvenate the appearance of the face. Designed to smooth away fine lines and wrinkles, muscle-relaxer injections are a quick and effective solution to produce a more relaxed, refreshed, youthful, and less worried and angry look.

During the anti-wrinkle injections procedure, a purified protein is injected in minute quantities to soften dynamic facial lines by blocking muscle contraction. Anti-wrinkle injections block muscular activity that causes facial lines and wrinkles and usually last for several months. These anti-wrinkle treatments take approximately 30 minutes.

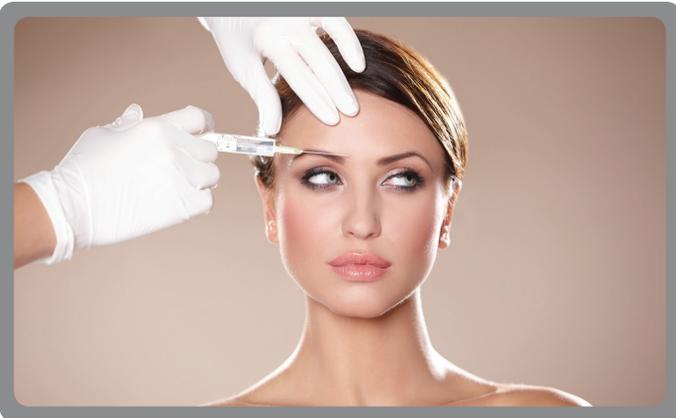

Cosmetic Injections from 30 mins

Cosmetic injections can reduce the appearance of fine lines, wrinkles, creases, folds, and other visible signs of ageing for a more youthful and radiant complexion. If you have lost facial fullness over the years, you may want to consider using a dermal stimulant to rejuvenate your appearance. Our philosophy regarding lip enhancement, whether it is to define or plump the lips, is to keep it looking natural.

There are several categories of cosmetic injections currently available in Australia. Each type of filler has their own, unique properties and depending on your specific needs and budget, our practitioners will guide you in selecting the most appropriate treatment options.

Sclerotherapy from 30 mins

Sclerotherapy is an injection procedure that can greatly reduce or frequently remove unsightly spider veins on the face or legs. Spider veins tend to be very fine veins which are red or purple in colour. Spider veins are usually a hereditary problem and often occur due to pregnancy, birth control pills or hormone replacement therapy, as well as in people whose jobs require standing all day. You can help minimise the development of spider veins with regular exercise, weight control, and wearing support stockings while working. Sclerotherapy at Silkwood Medical is limited to spider veins. However, if larger blue veins or varicose veins are noted a referral will be made to an exceptional practitioner specialising in larger vein therapy.

PACKAGES

Renew 60mins **\$200 (Value \$350)**

A great introduction to skin exfoliation, with little to no downtime. The skin will be deeply exfoliated and left feeling smooth and looking bright. Perfect for our male clients.

*1 x Skin assessment; 1 x Microdermabrasion;
1 x Blueberry Smoothie peel.*

Refresh 90mins **\$580 (Value \$800)**

A professional treatment designed to help regain a brighter and smoother complexion. By addressing uneven skin tone, the effects of aging, stress and the environment, a full face rejuvenation will result.

1 x Skin assessment; 1 x Microdermabrasion; 1 x Epiblade; 1x IPL.

Revitalise from 75mins/visit **\$1750 (Value \$2050)**

The perfect preparation before any big event. Starting with the Dermastamp to kickstart collagen stimulation and infuse hydration into the skin. The following month Profractional treatment will resurface the skin and enhance collagen remodelling. The skin will be left glowing and refined following the Epiblade levelling and Blueberry Smoothie Peel. Great for our Brides to be prior to their big day.

*1 x Skin Assessment; 1 x Dermastamp; 1 x Profractional;
1 x Epiblade and Blueberry Smoothie peel.*

Restore from 45mins/visit **\$1850 (Value \$2150)**

Remove pigmentation and reverse sun damage with corrective BBL and Laser treatments. Pigment is shattered, and collagen stimulated to result in even skin tone that is smooth and polished.

1 x Skin assessment; 2 x BBL; 1 x Microlaserpeel.

Rebalance from 45mins/visit **\$1750 (Value \$2060)**

Reduce breakouts with an intensive course of BBL blue light to kill the bacteria that causes acne. This, combined with a series of Vit A peels will help to diminish future breakouts and leave the skin exfoliated and clearer.

1 x Skin Assessment; 3 x BBL; 3 x Vit A peels.

Rejuvenation from 75mins/visit **\$1850 (Value \$2150)**

Boost the skin by combining the benefits of MicroLaserPeel and Profractional to regenerate new collagen, and renew the surface of the skin. Ideal for wrinkles, scarring and scar damage for optimal rejuvenation.

*1 x Skin Assessment; 1 x Dermastamp;
1 x MicroLaserPeel and Profractional.*

Revamp from 30mins/visit **\$1200 (Value \$1550)**

Enhance the eyes with this tailored treatment to combat Crows feet and frown lines. Wrinkles will be plumped, and tone and texture improved.

1 x Skin Assessment; 3 x undereye Microlaserpeels.
